Syntax

Providing Multiple Names to the Class Attribute Value

We can provide multiple names to the Class Attribute value

```
<tag class="name1 name2 name3 name4 ...>  
                                Attribute Value
```

In general, we call these names as **class names**

Providing Multiple Names to the Class Attribute Value

Example

HTML

```
<button class="button button-green">  
  Get Started  
</button>
```

Get Started

CSS

```
.button {  
  height: 36px;  
  width: 138px;  
  border-width: 0px;  
  border-radius: 10px;  
}  
.button-green {  
  background-color: #8cc63f;  
}
```

Reusability

Providing Multiple Names to the Class Attribute value

HTML

```
<button class="button button-green">  
  Get Started  
</button>  
<button class="button button-orange">  
  Visit Now  
</button>
```

CSS

```
.button-green {  
  background-color: #8cc63f;  
}  
  
.button-orange {  
  background-color: #f7931e;  
}
```

Introduction to Bootstrap

What is Bootstrap?

Bootstrap is a large **collection** of predefined **reusable** Code Snippets written in HTML, CSS, and Javascript

Example: Buttons, Cards, etc.

Bootstrap

Introduction to Bootstrap

How to use BootStrap?

To use the **code snippets** provided by Bootstrap, we need to add a piece of code within the **head** element.

We call them **BootstrapCDN**

HTML

```
<!DOCTYPE html>
<html>
  <head>
    ...
  </head>
  <body></body>
</html>
```

Introduction to Bootstrap

Including Bootstrap in the HTML Document

```
<head>
  <link
    rel="stylesheet"
    href="https://stackpath.bootstrapcdn.com/bootstrap/4.5.2/css/bootstrap.min.css"
    integrity="sha384-JcK8q3iqJ61gNV9KGb8thSsNjpSL0n8PARn9HuZOnIxN0hoP+VmmDGmnSt9UJ0Z"
    crossorigin="anonymous"
  />
  <script
    src="https://code.jquery.com/jquery-3.5.1.slim.min.js"
    integrity="sha384-DfXdz2htPH0lsSSs5nCTpuj/zy4C+OGpamoFVy38MVBnE+IbbVYUew+OrCXaRkfj"
    crossorigin="anonymous"
  ></script>
  <script
    src="https://cdn.jsdelivr.net/npm/popper.js@1.16.1/dist/umd/popper.min.js"
    integrity="sha384-9/reFTGAW83EW2RDu2S0VKaIzap3H66lZH81PoYlFhbGU+6BZp6G7niu735Sk71N"
    crossorigin="anonymous"
  ></script>
  <script
    src="https://stackpath.bootstrapcdn.com/bootstrap/4.5.2/js/bootstrap.min.js"
    integrity="sha384-B4gt1jrGC7Jh4AgTPSdUtOBvf08shuf57BaghqFfPlYxofvLB/KUEfyiJOMMV+rV"
    crossorigin="anonymous"
  ></script>
</head>
```

Introduction to Bootstrap

Bootstrap Class Names

Bootstrap provides us with various predefined **class names** which we can use for **class attribute values** to add styling to our website easily

```
<tag class="name1 name2 name3 name4 ...">
```

Attribute Value

Predefined Styles in Bootstrap

Buttons using Bootstrap

HTML

```
<button class="btn">  
  Get Started  
</button>
```

Bootstrap

Bootstrap Rulesets

css

```
.btn {  
  font-size: 16px;  
  border-radius: 5px;  
  height: 36px;  
  width: 138px;  
  border-width: 0px;  
}
```

css

```
.btn-primary {  
  color: white;  
  background-color: blue;  
}
```

Bootstrap

Predefined Class Names

active	badge	caption
affix	bg-danger	caret
alert	bg-info	carousel
alert-danger	bg-primary	collapse
alert-dismissible	bg-success	card
alert-link	bg-warning	card-body
alert-success	btn	disabled
		divider
		many more...

Note: Don't use predefined bootstrap class names in CSS Rulesets

Bootstrap

Our Code

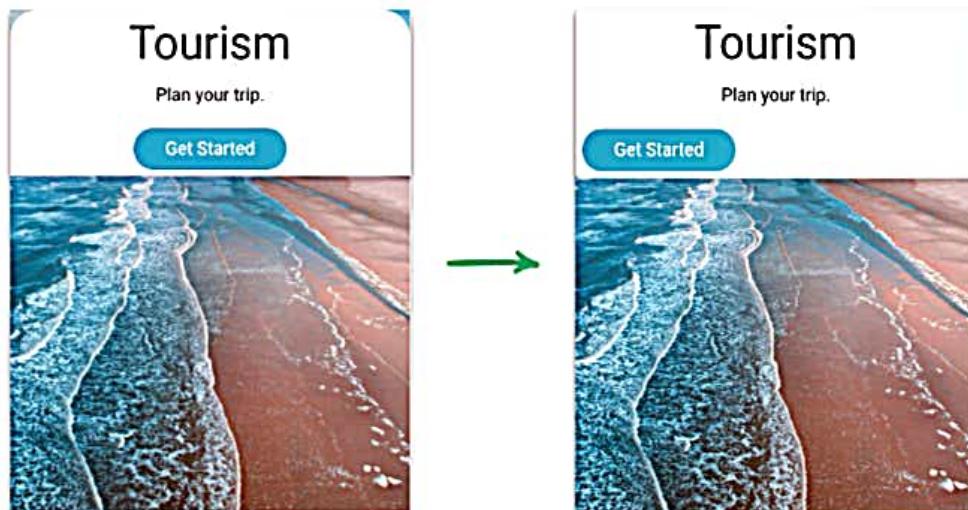

HTML

```
<body>
  <div class="bg-container">
    <div class="card">
      <h1 class="main-heading">Tourism</h1>
      <p class="paragraph">
        Plan your trip.
      </p>
      <button class="button"> Get Started </button>
    </div>
  </div>
</body>
```

Bootstrap

Why did the output change?

NXT
WAVΞ

Why did the output change?

card is a predefined bootstrap class name.

Using predefined Bootstrap class names may give unexpected results.

css

```
.card {  
    text-align: center;  
    background-color: white;  
    border-top-left-radius: 25px;  
    border-top-right-radius: 25px;  
    padding: 5px;  
}
```

Bootstrap

Changing Card Class Name

CSS

```
.card {  
    text-align: center;  
    background-color: white;  
    border-top-left-radius: 25px;  
    border-top-right-radius: 25px;  
    padding: 5px;  
}
```

CSS

```
.tourism-card {  
    text-align: center;  
    background-color: white;  
    border-top-left-radius: 25px;  
    border-top-right-radius: 25px;  
    padding: 5px;  
}
```

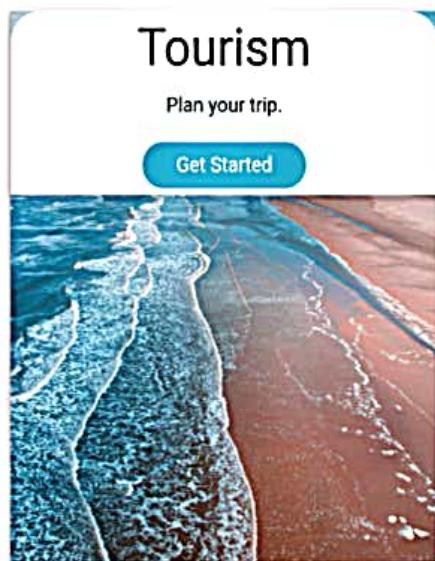

Bootstrap with our Code

HTML

```
<body>
  <div class="bg-container">
    <div class="tourism-card">
      <h1 class="main-heading">Tourism</h1>
      <p class="paragraph">
        Plan your trip.
      </p>
      <button class="button"> Get Started </button>
    </div>
  </div>
</body>
```
